Farm Safety Quiz

How safe is your farm? How safe are your working habits? Test your safety knowledge with this quiz and see how you rate for safety:

1 When should adjustments be made on the tractor?

(a) When in motion.
(b) At a standstill.

2 Before you attempt to crank the tractor you should—

(a) Try crank to see if tractor is in gear.
(b) Disengage gear and set emergency brake.

3 In operating tractor you should—

(a) Avoid working close to treacherous ditch banks.
(b) Work all land that can be cultivated adjacent to ditch banks.

4 Home dry cleaning should be done—

(a) In the kitchen.
(b) In the basement.
(c) Outdoors.

5 How should hay chute openings be constructed?

(a) Have them open for convenience in getting hay down.
(b) Have chute frame extend to mow roof.

6 A safe rule to follow in storage of gasoline is—

(a) Keep in building nearest tractor for convenience.
(b) Store outside away from farm buildings.

7 The cord on the electric iron should be plugged into—

(a) A conveniently placed drop cord.
(b) A wall outlet.

8 All branch fuses in the electrical wiring system should be—

(a) 15 amperes.
(b) 45 amperes.

9 When working on an electrical conductor it is—

(a) Necessary to cut off current.
(b) Not necessary to cut off current.

10 One of the best ways to prevent exhaustion during extremely warm weather is to—

(a) Drink plenty of cold water, preferably iced water.
(b) Drink plenty of water, not iced, and take extra salt.

(c) Eat light meals.

Answers on back page

Judging Panels Being Assembled

Judging panels are being assembled by provincial committees in the Western Division of the National Barley Contest to start field judging for the 1,234 entries in the three prairie provinces.

To staffs of the provincial and Dominion departments of agriculture, competent to do the work, will have to be added other personnel, particularly in Manitoba where there are 507 entries. Otherwise the field judging cannot be completed by the end of July. So nearly as this is possible this is the deadline set by the provincial committees.

The official score card for the field judging is the same as already announced by the committee. Of the eight points to be taken into consideration freedom from weeds is the most important. Twenty five points are allowed for this. There will be 15 points for purity of variety.

Six other factors will be considered in tabulating point score of the fields namely: General neatness of field and uniform seeding, freedom from other grains, freedom from disease and insect pests, uniformity of stand, evenness of maturity and apparent yield. For each of these there is a possible ten points.

PAPER PRODUCTION CURTAILED

Production of wrapping paper, shopping bags and brown envelopes is to be curtailed as a result of an order issued by the Prices Board. The action has been taken to provide for demands for paper of this kind in food and construction packing programs.

Conductor — What's that you're holding on your lap?
Passenger — It's an unexploded bomb I'm taking to the police station.

Conductor — Goodness man Put it under the seat.

Tree Planting on Prairie Farms

Trees planted for windbreaks, field shelterbelts, etc., are beneficial because:

1 They protect farm homes, make them more attractive and reduce fuel consumption and costs.

2 They shelter livestock and reduce feed requirements.

3 They reduce farming costs by producing fuel and fence posts.

4 They protect field crops, gardens, orchards and ornamental plants.

5 They improve farmstead appearances and prevent inconvenient snow accumulation.

6 They attract insect eating song and game birds.

7 They lessen soil drifting and reduce water loss from soil, dugouts and dams.

On few farms sufficient trees have been planted to meet all purposes or to produce all the desired benefits.

If you are considering planting trees next spring it is advisable that the area where the trees are to be planted be

thoroughly summerfallowed this year. A strip of about 16 feet on each side of where the trees are to be planted should be included in the summerfallow.

For information regarding suitable varieties for the prairies write the Dominion Forest Nursery Station, Indian Head, Sask., or the Department of Lands and Mines, Forestry Service, Edmonton, Alta. The above listed places are also sources of supply for shelterbelt trees.

THE WORLD OF WHEAT

By H. G. L. STRANGE

Many thousands of samples of wheat, each representing a farmer's wheat crop now growing, have been sown at a number of points in Western Canada. Many farmers during the course of the summer will, as usual, visit the Dominion Experimental Farms and our Prairie Universities to see the good things in agriculture being shown. Visitors to these farms and universities should make a point of seeing the "Crop Testing Plan" samples which will there be found growing, for the Crop Testing Plan work is all done with the kind co-operation of these worthy institutions.

At these plots farmers will be able to see at a glance the kind

of wheat crops that are being grown in different districts. Scattered among these plots of farmers' samples will be found true to variety plots of the variety best suited to the district, so a direct comparison by the eye can be made. Some good samples will be seen and some, unfortunately, consisting of mixed varieties.

Crop Testing Plan plots enable each farmer to know precisely the relative trueness to variety of the crops he is growing on his own farm, so he can judge whether he should secure better seed for next year's sowing.

WEDDINGS

Raymond Young of Grainger and Ruth Findlay of Didsbury were united in marriage at Didsbury on Tuesday, July 9. They left for a honeymoon in Vancouver and will reside at Didsbury upon their return.

Card of Thanks

Mrs. Ada A. Barber of Swallowell wishes to thank the Old Timers Association and many friends of Carbon and district for floral tributes and many kindnesses shown her during her stay in Drumheller hospital.

If You Are
a No. 1 Citizen

You will look after

No. 1...

THIS is not selfishness, but the realization that a community is no better, no sounder than its citizens. The welfare of our community—Canada—depends not alone on those charged with the government of the country, but on each of its citizens—12,000,000 strong.

Today, that welfare is menaced by the danger of inflation. Already, millions in lands devastated by war suffer misery because of it.

Inflation, to the citizen, means simply less and less value for his dollar . . . his living costs soar as free and careless spending drives up the price of goods still in short supply.

War always brings the threat of inflation in its wake . . . only the prudence of the people can keep it in check.

How? Mainly, by conservation . . . by buying only those goods which are in fair supply, and by saving money for the day when goods now in short supply will be readily available.

This helps to keep prices steady—to keep your dollar at its real worth.

This means that, if you are a No. 1 citizen, you will rigidly avoid black market purchases and you will save money by

- building up your savings account;
- keeping up your insurance;
- buying Government bonds and War Savings Certificates;
- holding whatever of these securities you have bought.

This is conservation—the first requisite for personal security—the first attribute of good citizenship.

Civilian Aviation

THE RECENT DECISION of the Provisional International Civil Aviation Organization, usually referred to as PICAO, to make its permanent headquarters in the city of Montreal was welcomed in all parts of Canada. PICAO is considered to be one of the most important of the international organizations and it is a tribute to Canada that aviation leaders from the twenty-seven member states represented should select this country for the site of its permanent headquarters. On air maps showing the northern hemisphere Canada appears to be in the centre, rather than at the top of the world, and many important air routes lie across Canadian skies. As a country which will undoubtedly play a leading part in the future development of aviation, Canada has been deeply interested in the organization of PICAO, whose work is concerned with establishing an international air technical code and other related matters.

Many Reasons For Concern

In addition to her geographic position, Canada has many other reasons for being deeply interested in the future of commercial aviation. During the war many thousands of Canadians were trained in the production, maintenance and operation of aircraft, and large numbers of these skilled workers are now available for civilian employment. Figures show that more than 120,000 men and women have been employed in the production of aircraft here, while 250,000 men entered the Royal Canadian Air Force for training, 73,000 graduating as air crew. During the war, Canada also developed many fine airports. All the bases established for training or defense purposes are not of practical value for commercial uses, but some others have been leased by the government to municipalities and other bodies for a nominal sum, and will be used for civilian flying. It is estimated that there are some 280 land airports in Canada.

Rapid Advances During The War

and many technical devices were invented. All these things have contributed to the making of a new and brilliant chapter in aviation history, but they have also raised many problems in regard to civilian international air travel. PICAO was organized to deal with these problems and to establish accord among the nations in matters pertaining to civil aviation. The organization faces a difficult and exacting task but if it succeeds it will be an important instrument for preserving world peace. Canada has given leadership in forming this body, and the fact that the permanent headquarters will now be located here adds to the general interest in the success of its work.

As was the case in many fields, aviation made very rapid advances during the war. New international air routes were mapped out, new types of planes were developed and much equipment

GEMS OF THOUGHT

NATIONS

A nation is the unity of a people.—Coleridge.

A State to prosper, must be built on foundations of a moral character; and this character is the principal element of its strength and the only guaranty of its permanence and prosperity.—Jabez Curry.

The commandments of God are the bread of life for the nations.—Roswell D. Hitchcock.

God is Father, infinite, and this great truth, when understood in its divine metaphysics, will establish the brotherhood of man, end wars, and demonstrate "on earth peace, good will toward men." — Mary Baker Eddy.

The true grandeur of nations is in those qualities which constitute the true greatness of the individual.—Charles Sumner.

Until nations are generous they will never be wise; true policy is generous policy; all bitterness, selfishness, etc., may gain small ends, but lose great ones.—Washington Irving.

SAFETY MEASURE

According to the Scientific American, a new radio distance indicator for trains which can detect the approach of any other train up to eight miles is now being put into use by the Rock Island R.R. to eliminate danger of accidents. These "radio" units are installed both in front and in the rear of trains; they send out signals in code, and automatically convert signals received into distance, thus immediately warning the engineer of any danger.

SLIGHTLY OVERRATED

It is quite doubtful that camels as many suppose, can go without water for a week without great discomfort or physical danger. Two or three days is believed to be the limit.

Muskox Sequel

Meeting To Be Next Fall In The Alaska Area

In line with the continental defence policies under study by the permanent joint defence board, Canadian observers will be on hand when large-scale American sequels to the Canadian Muskox expedition are held next fall and winter in the Alaska area. Canadians will be present on both Operation Frigid and Operation Williwaw in Alaska and full reports on Operation Frost in Wisconsin will be given to the Canadian general staff.

Price Control And Rationing Information

Q.—Where do we turn in spare ration coupons or meat tokens? I have been told if we turn in unused valid ration coupons, rationed food equal to the value of coupons, will be forwarded overseas to starving people.

A.—The local ration board in your community will accept any spare ration coupons you may have. Your local ration board can also give you information about groups who will be collecting ration coupons in your neighbourhood. Every group must carry an official card from the Ration Administration and you are to ask to see this card before handing over your coupons or tokens.

Q.—We will be hiring extra help from time to time on our farm this summer. How many meals must I serve before I am entitled to extra coupons?

A.—Extra ration coupons are only issued for a total of twelve meals or over. If extra help is required for two weeks or more, the ration book of the person employed must be given to you.

Q.—I heard on the radio that meat coupons M-29 to M-39 and butter coupons R-1 to R-9 will become invalid for the purchase of these commodities after June 30. Does this mean that the "Beaver" coupons, issued to members of the armed forces and other temporary ration card holders, will also be declared invalid?

A.—"Beaver" coupons will not be affected by the radio announcement, which you heard. These "Beaver" coupons, and all sugar coupons, will remain valid until further notice.

EMPIRE DAY SYMBOL—Impressing figure at the Tokyo's May 24 celebration by British units in Japan is this drum major of the Indian Air Force standing at attention in front of the forces recreation centre. Official opening was held on Empire Day.

Private Planes

Will Be So Commonplace That They Will Disturb The Peace

Former General Doolittle's prediction that 400,000 private planes will be flying in the United States within nine years, is no doubt a sign of great aviation progress. Yet the average citizen is bound to wonder how much peace and quiet can be expected when such a goal is reached. The night and day drone of planes is already causing annoyance to householders living in the neighbourhood of airports. What is it going to be like when flying has become commonplace? Let us hope plane manufacturers are working on silencing devices to tone down the racket.—Boston Post.

A sparrow flaps its wings nearly 800 times a minute.

ITCH CHECKED in a Jiffy -or Money Back

For quick relief from itching caused by eczema, athlete's foot, scabies, pimples and other itchy conditions, use D.D.D. CHECKED. medicated, liquid soap. D.D.D. CHECKED. removes dirt and stains. SMILE AWHILE

Wife: "Are all men as stupid as you are?"

Husband: "No, dear, look at all the bachelors there are."

Mother: "I told you just now to stop that noise!"

John: "I know, but this isn't the same noise. I was playing the drum then, but I'm blowing my whistle now!"

"Married men make the best commercial travellers," asserts a business magnate.

No doubt because they are so used in taking orders.

"Hello, old man, I haven't seen you for some time."

"I've been in bed for seven weeks."

"That's too bad. Flu, I suppose?"

"Yes and crashed."

Visitor: "My, you're a bright little girl. How do you know it's the first of the month?"

Child: "Cause all of daddy's letters have front windows in them."

Teacher: "Do you know why the little chickens come out of the eggs, Tommy?"

Tommy: "They know they'd get cooked if they stayed inside."

"I believe," said the bride, "in a perfect understanding between a man and wife. I intend to make my husband understand that he no longer can do whatever he pleases."

Cavalry Recruit: "I don't like the look of the horse's head, sir."

Sergeant: "Oh, don't worry. You'll soon get over that!"

Husband: "Anything nice for tea tonight, dear?"

Wife: "Oh, yes, sponge cake. I sponged the eggs from Mrs. Smith, the flour from Mrs. Jones and the milk from Mrs. Duncan."

"How did your wife like the diamond ring you gave her for her birthday?"

"Delighted. She was awfully nice for a couple of days. But she's herself again now."

"George looks worried today. What's wrong with him?"

"Oh, he's been contesting his wife's will."

"His wife's? I didn't know she was dead."

"She isn't."

Teacher: "There's only one truthful boy in this class."

Smith (in an undertone), "That's me."

Teacher: "Did you speak, Smith?"

Smith: "No, sir."

Orphan Village

To Be Built In Switzerland To Shelter Children From Devastated Europe

Foundations of a village to shelter 350 orphans from various devastated European countries were laid recently on an eleven acre tract near Trogen, in the mountainous eastern part of Switzerland.

The first 15 dwellings will be built in Swiss farm style, surrounded by orchards and pastures. Three to five houses will be grouped to form a community where the children will be instructed by Swiss and foreign teachers.

The children's village was named Pestalozzi, after the famous Swiss educator who died in 1827. 2678

More Recognition

Should Be Given To Authors And Composers In Canada

More scope and better rewards for Canadian authors and composers were advocated by Leslie A. Boosey, leading English music publisher, who attended the annual meeting of the Canadian Authors' and Publishers' Association in Toronto.

"Canadians tend to underestimate the value of their authors and publishers and limit rewards to individuals and societies," said Mr. Boosey, president of the International Confederation of Authors' and Composers' Society.

When your BACK ACHEs...

Backache is often caused by lazy kidney action. When kidneys get out of order excess acids and poisons remain in the system. Then backache, headache, rheumatic pain, disturbed rest or that "tired out" feeling may soon follow. To help keep your kidneys working properly—use Dodd's Kidney Pills. Time-tested, popular, safe, non-habit-forming. Demand Dodd's Kidney Pills, in the blue box with the red band. Sold everywhere. 135

Ghost Rocket

Was Seen To Pass Over Finland At High Altitude

Witnesses said they had seen a light-emitting "ghost rocket" pass over Helsinki, the Finnish capital, in a southwesterly direction. The rocket, the observers said, was flying at an altitude of 900 to 1200 feet and was followed by a smoke trail. It was the first one observed in Finland, although several have been reported lately crossing southern Sweden and Denmark in approximately the same direction.

CUT FOOD COSTS... RAISE FOOD VALUE

with "MAGIC" EGG ROLL

2 c. flour
4 tsp. Magic Baking Powder
1/2 tsp. salt
1/4 lbs. shortening
1 egg
1/2 c. milk
5 hard boiled eggs
4 tbs. milk
2 tsp. lemon juice
3 tsp. chopped onion
1/2 c. chopped parsley
2 tbs. chopped green pepper
1 tsp. dry mustard
Salt, pepper, paprika

Sift together first 3 ingredients. Cut in shortening. Beat egg in measuring cup; add milk to make 1/4 cup; add to first mixture. Roll out 1/4 inch thick, on floured board. Cut into hard boiled eggs, mix with remaining ingredients, spread on dough. Roll up like jelly roll and bake in hot oven (425° F.) 30 minutes. Serve with cheese sauce.

MADE IN CANADA
FOR SUCCESSFUL BAKING

A Round-Up Of Manitoba's Recent Agricultural Progress Is Contained In A Report

AN interesting round-up of Manitoba's recent agricultural progress is contained in the annual report of the Industrial Development Board of Manitoba. The following is part of the sub report of the Board's Soil Products Committee:

Dr. H. H. Saunderson last spring completed and submitted his detailed study on the manufacture of pulp, paperboard and wallboard from waste straw. Due to the technical and confidential nature of this report, it was not published but was acted upon by the Board in collaboration with the Manitoba Department of Agriculture. A sample of Regent wheat straw large enough for test runs was sent to Iowa State College at Ames, Iowa. A recent letter from Dr. L. K. Arnold, Research Associate Professor of Chemical Engineering there, states that "We have already made several runs of the board and the material looks promising."

Considerable progress was made in Manitoba in 1945 in flax fibre development, with the official opening of a Pilot Flax Fibre Mill at Portage la Prairie on December 21, 1945.

This was built and is being operated by the Dominion Department of Agriculture. Initial cost of this project was \$100,000, and the Dominion Government is providing \$20,000 per annum for this research.

The Minnesota process for making high-grade linen fabrics from the straw of flax grown for seed, sponsored by the Minnesota-North Dakota Resources Development Commission, was described by Dr. L. H. Reyerson, Chairman of the Commission, in an address on September 13 to the Soil Products Committee and its guests, which included the officers of the Board, members of the Manitoba Government and their deputies, and a number of scientific and technical men.

Dr. Reyerson also spoke on the production of alpha cellulose from aspen or poplar, a process which enlarges the prospects of profitable use of Manitoba-grown poplar.

In view of the keen demand for linseed oil the Soil Products Committee devoted some study to ways and means of encouraging the planting of increased acreage of oilseed flax in Manitoba.

The new plant of the Co-op Vegetable Oils Limited, at Altona, for extraction of vegetable oils, viz., sunflower seed, rape seed and flax seed, which was under construction last year, was placed in operation in March, 1946.

At Morden Experimental Farm, a pilot plant for the processing of oilseeds is being installed.

Mr. J. L. Welsh of Omaha, Nebraska, addressed the Soil Products Committee and a number of guests from the Winnipeg Grain Exchange and Canadian Wheat Board on November 15. Mr. Welsh is Vice-President of the Farm Crops Processing Corporation of Omaha, a \$6,500,000 plant which used 32,000 bushels of damaged and offgrade grains per day and had a peak daily capacity of 90,000 gallons of alcohol. Most of this alcohol went into the production of butadiene for synthetic rubber.

The Soil Products Committee corresponded with Dr. E. S. Archibald, Director of the Central Experimental Farm at Ottawa, and with Mr. W. R. Leslie, superintendent of the Dominion Experimental Farm at Morden, on the subject of fruit and vegetable processing.

The use of cereal straw for insulating board, uses for wood waste and dead fall of the forests, and fertilizer from the sludge of the sewage disposal plant are being actively investigated. Every effort is being made for the establishment of sound industries utilizing such raw materials.

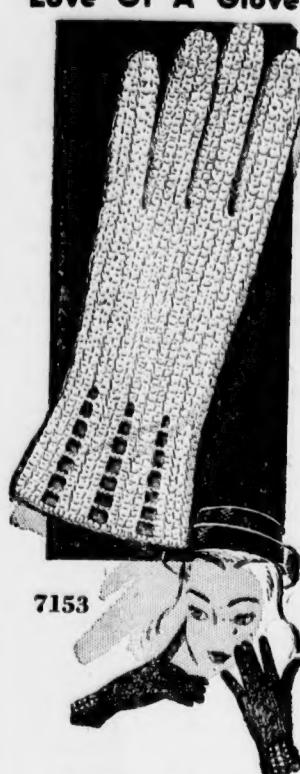

The easing of Government restrictions made it possible to start a new business. This was reflected by the fact that during the year forty-six new industries commenced operation in Manitoba.

The outlook for the coming year is encouraging. Your committee believes that aggressive action coupled with unprecedented consumer demand will result in the establishment of many new industries within the province.—Canadian Finance.

CAN BE OVERDONE

Dr. Hamilton Robinson, professor of dentistry at Ohio State University, warned the St. Louis Dental Society that a person can overdo brushing the teeth. One might work half way through a tooth in six or seven years by applying the brush too vigorously and using dentrifices containing an excessive amount of abrasives, he said.

Love Of A Glove

by Alice Brooks

Republic Preferred

Policy Of Italy's King Did Not Suit The People

When the Italian people voted King Umberto off the throne which he has occupied for less than a month, they were not merely registering a preference for a republic over a monarchy. They were returning a verdict and passing a sentence on the House of Savoy. This was proved by the curt manner in which the government announced that the ousted king would leave Italy.

As long as Umberto's father, former King Victor Emmanuel III, took as a model the democratic monarchies of Western Europe—Britain, Holland, the Scandinavian countries, etc.—all went well with the House of Savoy. From the moment when Little Vic attached himself to the coat-tails of the blackguardly dictator, Benito Mussolini, the House of Savoy was doomed.

As a matter of fact, Mussolini abolished the House of Savoy as authentic royalty.—Buffalo Courier-Express.

TREATMENT OF INDIANS

Put bluntly, we treat the Indian as a poor relation, and take few steps to help him move out of that category. We expect him to stay out of sight as much as possible, in areas labeled for his use alone. If he ventures into the wider world around him to make a living, he suffers certain penalties. He is apparently condemned to hunt and trap and fish, and be content with such constricted occupation in perpetuity.—Victoria Colonist.

Gloves crocheted in string are the choice of the smartly dressed woman. They launder easily and come out like new.

Rich-looking crocheted gloves go "hand in hand" with this season's styles. Pattern 7153 has directions in small, medium and large size.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Our newest Needlework Book, 1946 edition, is yours for only Twenty Cents more—104 illustrations of designs for crochet, knitting, toys, home decoration, embroidery, and a Free Pattern for three potholders printed in the book.

To Feel Right — Eat Right!

Department Of Agriculture Is Planning To Extend Research Work This Year

TO enable scientists of the Department of Agriculture to extend their work, estimates submitted to the Dominion Parliament this session are substantially higher than those approved at the last session. Should this year's estimates pass, the research activities of the Department will be facilitated to carry out the considerable expansion that has been planned for some time.

The scientists have brought and are developing new and better cereals, grasses, clovers, fibre crops, fruits and vegetables. Many of these plants, such as soybeans, were never grown in Canada until the Canadian plant breeder produced early varieties that would mature in Canada.

The large grain growing industry of Western Canada would not have been possible had it not been for the work of Canadian scientists producing earlier sorts of grain. In addition to having produced new strains of cereal grains they have also bred varieties resistant to diseases and have evolved methods to protect Canada's forests, crops, and gardens against the incessant inroads of insects. Now the work may be expanded.

Considerable expansion will be carried out at the Dominion Experimental Farms and throughout the Prairie Provinces in connection with soil drifting, the use of new varieties of crops, and the adoption of the latest cultural methods. In the Division of Botany an increase in the work has been made possible on the control of diseases of fruit and vegetable crops and control of seedborne diseases.

An encouraging expansion is taking place in the Division of Entomology where an additional amount of \$203,235 has been provided for agricultural entomology and \$461,463 for forest entomology for fighting crop and forest destroying insect pests. Expansion has taken place on the control of field crop, garden, and fruit insects in Eastern Canada and British Columbia and on insects at

tacking grain crops in the Prairie Provinces.

The important work of preserving Canada's forests is also being extended. Increased staff and facilities have been arranged for the forest insect survey to determine the extent and nature of insect destruction in the forests, and a new research laboratory constructed by the Ontario Department of Lands and Forests at Sault Ste. Marie is being equipped and staffed by the Dominion Divisions of Entomology for intensified research on the control of forest insects by cultural methods and by parasitic insects, and diseases of insects. The Laboratory will be the largest and best equipped of its kind in North America. —St. Thomas Times-Journal.

Something New

United States Navy To Have A Battleship Without Guns

A battleship without guns will be something new in the navies of the world. But the U.S. Navy now plans to complete the Kentucky, originally designed as one of the huge Iowa, Missouri class, without its 16-inch guns.

The battleship has always been regarded primarily as a gun platform, but the Kentucky will be an experimental rocket platform, according to present plans. It also may make some use of atomic weapons, and for that reason its completion is being delayed until after the Bikini blast. —Chicago Daily News.

Italy's Royal Exiles Now In Portugal

King Umberto of Italy clung to his throne after the "republic" plebiscite, then flew to Portugal. In happier days three of his children, now

is at left with his sister Beatrix. Princess Maria Pia is in the centre.

Three of the royal children are seen enjoying a buggy ride before they left the palace in Rome. Baby sister Princess Beatrix is the special charge of Prince Victor Emmanuel and Princess Maria Pia. Princess Gabriella is not shown. The Italian queen was formerly Princess Maria Jose of Belgium.

ORANGE PRICES

Canadian price ceilings on oranges are to be stabilized in line with the level of price prevailing in the United States on June 29 of this year the prices board has announced.

This action became necessary following the renewal of the United States price ceiling regulations on June 30.

Canadian prices will be based on the June 29 OPA ceiling prices plus transportation and customary markup.

This action is identical with that taken last November when OPA temporarily suspended price ceilings.

AT YOUR SERVICE

In 1886 — 60 years ago — the Dominion Experimental Farms were founded. Starting with five farms the System has since been extended to 34 farms and stations and 210 illustration stations. This System, the largest and most comprehensive of its kind in any country, is maintained, with the other Services of the Dominion Department of Agriculture, for the promotion of agriculture and the national economy of Canada.

As a result of the work carried out in the past by all the Services of the Department in co-operation with the provinces and agricultural colleges, a much greater measure of stability has been given to farming in the Dominion.

Now that the war has ended all the Services of the Dominion Department of Agriculture — Experimental Farms, Science, Production and Marketing — visualize a broader and fuller program of usefulness to the people of Canada. The facilities of these Services are varied and extensive. Everybody in Canada is invited to take advantage of them freely. The Department is always ready to assist in any way in the advancement of the basic industry of Canada — Agriculture.

Dominion Department of Agriculture

Ottawa, Canada

HON. JAMES G. GARDINER,
Minister

DR. G. S. M. BARTON.
Deputy Minister

Red And Blue Beef Prices

Wholesale ceiling prices on beef of red and blue quality will be reimposed on July 20th at levels varying from one to two cents per pound higher than those in effect prior to May 27. the Prices Board has announced.

Board officials explained that this action was taken following meetings with various sections of the industry over the past few weeks and stressed the fact that it had nothing whatever to do with recent changes in the status of O.P.A. regulations in the United States.

The Board suspended wholesale ceilings from May 27 to July 20 on red and blue brand beef to encourage marketing of top quality cattle and, with this regulation terminating July 20 officials expressed confidence that they would be able in spite of many difficulties to have the new pricing schedules ready to go into operation when the suspension order terminated.

The new schedule of wholesale prices will be accompanied by a varying adjustment in retail pricing in the different zone on red, blue and commercial qualities. This will mean that on many retail cuts there will be no advance in price, while on some of the better cuts of higher quality there will be an increase ranging from one to three cents per pound. In a number of zones there will be no increase in consumer prices on any cut.

The adjusted prices for the various zones of red, blue and commercial beef will allow for the difference in freight costs between various zones and will provide for a more equitable distribution. The revised maximum retail prices will provide the retailer with definite mark ups which the Board feels will be acceptable to the trade.

DO NOT DELAY

BUY COAL TODAY

GOOD QUALITY fuel is now available to early buyers. The supply is limited. Telephone or come and see us.

OFF THE RECORD

Judging by the figures seen in Ottawa the food shortage has not been so bad there!

OFF THE RECORD

There is considerable doubt being expressed about the report in Ottawa that the income tax in Canada may be reduced by as much as fifty percent but we are inclined to believe that this may be true, judging by the grave anxiety about unemployment in future!

Large Order For Reo Buses

The largest order for complete buses ever placed out of Chile has been received by Reo Motors, Inc., John T. Clark, export manager, announced today. It consists of 100 complete pusher type buses and will represent an investment of more than \$1,000,000 when they are delivered to Empress General de Transportes Colectives, the association of bus operators at Santiago, Chile.

The units are 31 passenger, 196 inch wheelbase and, except

that they will carry no heaters or defrosters, will be the standard type used in this country.

Shipping of the 100 buses represents somewhat of a problem because the holds of many ships are too small to accommodate a complete bus unit and many will go to Chile fastened to the boat deck.

OFF THE RECORD

Now that gasoline as well as tires are not rationed and more automobiles will be available a good slogan for drivers to remember is that drivers who will not give an inch on the road generally get six feet.

Wife (in back seat) Don't drive so fast.

Husband — Why not?

Wife — That policeman on a motorcycle behind us can't get by.

—★—

How are you this morning?
All right!

Well you ought to notify your face!

—★—

Barber — Will you have something on your face when I finish shaving you?

Customer — I doubt it.

Announcing ..

Willys JEEP

Three Units in One

A Car, a Truck and a Tractor

AT A SAVING

HAVING BEEN APPOINTED AGENT FOR THE ABOVE CARS AND TRUCKS AND JEEPS I AM PREPARED TO DEMONSTRATE THE VERSATILITY OF THE WILLYS JEEP RIGHT ON YOUR OWN FARM. JUST ASK FOR A DEMONSTRATION. NO OBLIGATION.

See What the JEEP Will Do . . .

- Haul loads up to 5500 lbs. with ease
- Pull Tandem Disc freely at 6 m.p.h.
- Operate 2-bottom, 12 in. Plow in any conditions
- Operate 24 inch Separator without trouble
- Pushes front beam snow plow to clear roads
- Use it as a car, a truck or a utility wagon
- The vehicle of a 100 and one uses on the farm
- Make time while the sun shines. Use a JEEP.

There will be a Special Demonstration at

Otto Martin's Farm
2 Miles Southwest of Carbon

Wednesday, July 24th, 1 p.m.

BIEBRICK AUTO SERVICE

Beiseker, Alta.

WORLD HAPPENINGS BRIEFLY TOLD

To stop book-thieving a "library detective" has been appointed in Birmingham, England.

Thornbury Castle, a 16th century relic, in Bristol, England, may be turned into a health centre.

Hundreds of Japanese swords, souvenirs of Burma battles, were confiscated from British troops arriving at Liverpool, England, recently.

The stamp collection of the late Sir Ernest Hotson, acting governor of Bombay in 1931, was sold at Harmer's, Bond street, recently for \$41,017.

A library of about 6,000 German books has been presented to King's College, London University, by a family of refugees who escaped from Germany before the war.

British naval headquarters at Valletta, Malta, denied reports that plans are being made to replace Malta by Cyprus as the Royal Navy's chief Mediterranean base.

Ducks Unlimited, Inc., at a meeting of its board announced its largest appropriation for the restoration and management of breeding grounds in Canada—\$275,000.

Portugal will permit United States and British military aircraft serving occupation forces in Germany and Japan to land in Azores in transit, the Foreign Office announced.

A peace medal, for sale to the public, has been struck by the South African Mint. Available in either gold, silver or bronze, the medal carries the Union coat of arms, and on the reverse a dove in flight with an olive branch in its beak.

Few Failures

Canada Now Shows A High Solvency In Business

An all-time peak for business solvency in Canada was established in 1945 with only 60 failures showing total liabilities of \$1,960,000. These figures, from the records of Dun & Bradstreet, compare with a peak of 3,695 failures in 1922 showing aggregate liabilities of \$78,069,000.

If the history of failures following the First Great War provides a forecast of events to come, Canada is heading into a rising tide of failures that will reach its ebb only after the current up-surge of business enthusiasm has been liquidated.

There has been a rush in recent months into all kinds of business enterprises, chiefly by returned men, powered by their war service savings and government loans. Many of these new ventures will, it is predicted, fall by the wayside but there is a feeling that the percentage of business wrecks will not approach the figures recorded in the post-war years of 1918-23.

Not only are statistics dealing with supplies and markets now more readily available but the disasters of 25 years ago left a legacy of experience that is likely to curb the gambling factor.

Failures came fast about three years after the end of the First Great War. The total for 1921 was 2,451 and 1922 brought the record peak of 3,695. Then followed a slow decline until the stock market crash in 1929 and the depression that resulted.

Looking To The Future

British Isles In The Centre Of A Great Oceanic Empire

More than 45 million people inhabit these islands, says the London Sunday Chronicle. How can so many, in so small an area, maintain a standard of living which, if not the highest, is nearly the highest in the world? The answer is clear. It is because these islands are the centre of a great oceanic Empire. That is why the problems of Empire—India, Egypt, Malaya, Palestine—cannot be dismissed by the ordinary citizen as distant and political, no concern of his. In very truth they affect every one of us in our daily life, in what we eat, in how we live. For the whole economic, financial, and industrial structure of this country is built on the foundation of Empire. Sever the Imperial connection and the gloomy prophecies of American observers, who foresee in this country a reduced standard of living and a population of no more than 20 millions or so, may become true.

SELF-RELIANCE

We have always thought that one reason farm boys and girls are more self-reliant than boys from the towns and cities is that they see on the farm that there are tasks which can only be accomplished by application and hard work. They have a training in work that stands them in good stead.

INDIAN CHILDREN will miss the spectacle of brilliant ceremonies if the ruling chiefs and princes—diamond aigrette, state elephants and all—are taken from India.

Saved By Disguise

The Leader Of Warsaw Uprising Succeeded In Fooling Nazis

Gen. Bor, leader of the Warsaw uprising, told recently of the search made for him by the Nazis after his capture. The general was a cavalry officer before the war. He participated in the 1936 Olympics, where he was photographed with Hitler.

He has a cousin, also a cavalry officer, who also participated in the 1936 Olympics and was photographed with Hitler. When the Warsaw revolt failed, and the men were taken prisoners, Bor reassumed the guise of a meek, scholarly teacher, and was treated as an ordinary prisoner. His cousin was sent to a concentration camp because the Nazis thought he was Gen. Bor.

Despite Shortages

Thousand-Year-Old Custom Observed Recently In English Village

ST. BRIAVELS, England.—Bread is scarce and cheese is rationed in Britain, but hundreds had both for the asking at a 1,000-year-old ceremony at this Gloucestershire hamlet.

Fifty pounds of bread and cheese in small cubes were thrown from a wall to townspeople and visitors. The Whitsunday custom commemorates the right of villagers to take wood from a section of the Forest of Dean.

Just how the bread and cheese is linked with the wood, no one remembers. W. G. Cheswick's family paid for the refreshments. The Food Ministry did not ask for ration coupons.

OUR COMPLETE SHORT STORY—**PHYSICIAN—HEAL THYSELF!**

By EMILY HERBERT

Copyright Wheeler Newspaper Syndicate

DOCTOR HARVEY GIBBS, the eminent psychiatrist, paced the soft-carpeted floor of his study and smoked his fifth cigarette since dinner. The house was quiet—much too quiet. That's the way it had been ever since his wife left him.

Night after night, alone in the house—and silence. He had tried turning on the radio, but that was worse. For through the noise of the music or the speeches, he would imagine he heard things: a car stopping, the door-bell ringing, light laughter in the hall,—Leone! And he would click off the radio suddenly and he would hear—nothing! Just blank stillness. So it was better not to play the radio. This way he could listen . . . and wait.

It seemed to Harvey Gibbs that he had been waiting half a lifetime; and yet it was only three months—the time he himself had set. And it had been worth it. He had gambled and won. Leone was coming home that night.

It had been a bitter blow when she told him that she was leaving him—going away with Geoffrey Lane. Harvey Gibbs loved his wife, and he believed that she loved him too. But she was young and gay, attractive to men. And Geoffrey was the romantic type, in contrast to his own middle-aged stodginess.

In his practice, Doctor Gibbs encountered dozens of similar marital problems. He usually advised the husband to let his wife have her "fling". Perhaps a great romantic adventure was all she needed. Perhaps, like Leone, she had been cheated of this by an early and practical marriage.

So he had asked Leone to wait three months before asking for a divorce. If she changed her mind she had only to let him know. He would be waiting.

Harvey sat down at his desk and took out the letter he had received from her when only two of the three months had elapsed. Reading it was like turning a knife in a wound but some compulsion made him read it all through again. Already it had been read and handled so often that the creases were worn thin.

It was dated from Florida and told how she and Geoff had rented

"the sweetest little cottage" on an isolated part of the beach. How they swam together, and boiled shrimps by a bonfire at midnight, and how she helped Geoff with his writing, and above all how gloriously happy they both were.

"Harvey dear," she had written in her impulsive script "you might just as well start those divorce proceedings, because it's all settled. Geoff and I are going to be happy together forever and ever."

But Harvey had stuck to his agreement and had gone on waiting. Then, only that day, with the time-limit almost expired, he had got her telegram. It lay beside her letter in the desk. He knew the words by heart.

"You were right. It didn't work. I left him a week ago."

Just that, and a request that she might come to see him that evening. Probably she was on her way now. Harvey pressed his fingers against his temples. If only the throbbing in his head would stop; then he could think, could realize. He knew he should be wildly happy, but he was so tired, oh, so very tired.

It was as though the strained tenseness of these past months had become so habitual that he no longer knew how to relax. He rubbed his forehead again but still that tight band seemed to be pressing in on his temples. He tried to picture their meeting. Would she have changed, he wondered. He himself had aged years. Only the other day he had caught his old houseman looking at him with an expression of pity. Pity—for him! The impudence of the fellow! But Leone, he must think of Leone. She would be ashamed and repentant, he knew, and probably humble at first. It would be up to him to nurse her bruised ego, to justify her actions in her own eyes, to forgive her completely.

So absorbed was Harvey in his thoughts that the muffled ringing of the doorbell and the quiet footsteps of the servant who answered it failed to pierce the shell of his abstraction. He rose to pour himself a drink, then steadied himself, one hand gripping the edge of his desk.

Leone was standing in the doorway. After all his waiting and listening he had after all failed to hear her come home. More beautiful than ever, her cheeks still flushed from the southern sun, she advanced to greet him. Harvey waved her to a chair without speaking. Leone watched him with some concern, uncertain what to do or say. He had sunk back in his chair, staring at her as if he did not see her. "Forgive me, my dear," he finally managed to say. "The shock of seeing you suddenly like that—it rather bowled me over."

But still he felt dazed and confused. He heard Leone speaking, but her voice seemed to come from far away. There was a ringing in his ears. It was almost as though he were inside one of those big glass bells they used to have in the laboratory at college. Vacuum bells. He supposed she was asking for forgiveness, and he tried to answer reassuringly but could find no words.

He groped in the drawer of his desk, took out a large clean handkerchief and mopped his forehead. That felt better. His head was cooler now and clearer. He could think. He put the handkerchief back in the drawer, and his fingers touched the cold metal of a loaded revolver that lay there.

Suddenly he knew exactly what he must do. And at that moment the band that had been tightening around his temples, seemed to break. What a relief! He felt calm and rested again. He stopped trembling.

Holding the handkerchief loosely in his hand, he rose and went to his wife. He put his arm about her shoulders.

"This is my answer," said Doctor Harvey Gibbs. And his finger pressed the hard metal under the folds of the clean white handkerchief.

For Full Information**Judge Advises Applicants For Citizenship To Read Newspaper**

"To keep properly posted about your new country I can give you no better advice than to read your newspaper. It is a complete fund of knowledge of news and events both here and abroad."

These are the words of Judge J. H. McDonald, of Sault Ste. Marie, addressed to nine aspirants for Canadian citizenship, in his court recently. His advice was given special point when one of the applicants could not even name the Canadian Prime Minister, the Premier of Ontario—or even the mayor of Sault Ste. Marie.

"SALADA" TEA**Plenty Of Land****Available In Western Canada And Suitable For Homesteading**

The land movement of 40 years ago, it is often said, can never be exactly duplicated, because farms are not to be obtained for the asking. It is true that most of the homestead land has been alienated and that a newcomer to the West who wishes to start farming on even terms with the men now established must buy his farm from a private owner. For the immigrants who are so inclined, however, there is still abundant opportunity for the pioneer. That is, there is still homestead land. None of it is near a railway or shipping facilities. But there are lands for a newcomer to the West available for homesteading that are up to the average in fertility and which may, within a few years, be well served by railway lines.—Guelph Mercury.

Sports College**Membership Is Reported To Be Nearing The 200,000 Mark**

"Coach" Lloyd Percival, director of the CBC-YMCA "Sports College", and William R. Cook report that the membership in the College is now nearing the 200,000 mark. There's nothing like "Sports College" in any other place in the world, they say. In Newfoundland whole schools are joining up en masse. There are over 15,000 coaches and club managers in the College. Over a million pieces of literature have been distributed, and nearly a million letters have been received. Athletes like Les Patrick, Syl Apps, Jack Dempsey, Carl Bennett, Colman Clark, Stan Cutts, Dean Cromwell and others endorse the project.

THE FOREST INDUSTRY

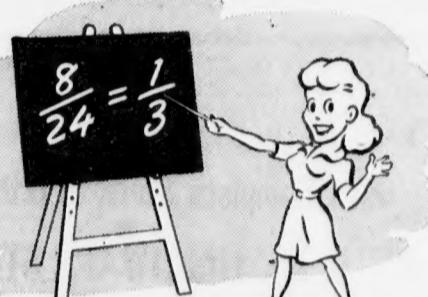

Canada's largest employer, the forest industry, has absorbed more returned men than any other industry because veterans are interested in permanent jobs "and they are just as keenly concerned with public policies that maintain full employment," Maj.-Gen. C. B. Price of Montreal, recently elected national president of the Canadian Legion, said in an interview.

PRINCESS IS BRIDESMAID—Princess Elizabeth was one of the bridesmaids attending the Hon. Mrs. Vicary Gibbs, a former lady-in-waiting, who was married to Hon. Andrew Elphinstone at St. Margaret's church, Westminster. The British Royal family attended the ceremony.

Great Step Forward**Man Invents A Machine To Regulate Length Of Speeches**

A Chicago inventor with an eye to giving aid and comfort to suffering humanity has come up with a machine that regulates the length of addresses by after-dinner speakers. This is a great step forward. It is to be fondly hoped that the gadget not only is foolproof, but that the inventor sets to work immediately on the mechanical additions or adjustments necessary to improve the quality of speeches. Most habitual listeners, however, would settle for an attachment to tune out at any time.—New York World Telegram.

what's your score**on Sleep?**

YOU spend about a third of your life at it—so you might as well know something about Sleep. What's your score on the following statements—true or false?

① the earlier hours of sleep are the best—

true: Science has found the first four or five hours are most beneficial.

② sleeping on the left side strains the heart—

false: It makes no difference whether the average person sleeps on his back or either side.

③ it is better to lie absolutely still when asleep—

false: The muscles of the body are benefited by periodic changes of position.

④ you can drink postum at any hour and sleep perfectly—

true: Postum is caffeine free—contains no stimulants of any kind.

Try Postum! Make it right in the cup, with boiling water or hot milk. Costs less than a cent a serving!
